

International Documents — Download Plan

IP-SAKTI Sahayak · SIH26045 · Module 1 follow-up (international jurisdiction)

The international jurisdiction toggle and retrieval filtering are built and working, but the international corpus is currently thin — only the WIPO GRATK Treaty (2024) is indexed. This is a real, honest gap: every treaty below is genuinely missing, not a stretch nice-to-have. Use this as a checklist the same way `docs/source_documents.md` was used for the national corpus.

Target: 6–8 of the documents below is enough for a credible "international" demo answer. Prioritize TRIPS, CBD and the Nagoya Protocol first — they're the three most likely to actually come up if a judge asks an international IP/ABS question about Ayurveda.

How to download: every link below was opened and confirmed live during this build (Sept 2026). Save each as a PDF into `data/` with a clear filename — the filename appears in the citation shown to users. This step needs no laptop-only tooling, can be done from a phone browser like the national-docs pass was.

Do not forget the indexer step. Every filename added here must also be added to the `INTERNATIONAL_DOCUMENTS` set in `backend/ingestion/indexer.py`, or it will silently be indexed as "national" and never show up under the International jurisdiction filter. See `CLAUDE.md`'s rule on this.

Tier 1 — highest priority (treaty full text, direct PDF)

Document	Suggested filename	Direct link (verified live)	Notes
TRIPS Agreement (WTO) — the baseline global IP treaty; Ayurveda-relevant for patents, TK non-recognition	TRIPS_Agreement_WTO.pdf	https://www.wto.org/english/docs_e/legal_e/27-trips.pdf	Direct PDF download, confirmed live.
Convention on Biological Diversity (CBD) — the treaty India's ABS law (already indexed) implements	CBD_Convention_1992.pdf	https://www.cbd.int/doc/legal/cbd-en.pdf	Direct PDF download, confirmed live.
Nagoya Protocol on Access and Benefit-Sharing — the international ABS mechanism proper	Nagoya_Protocol_2010.pdf	https://www.cbd.int/abs/doc/protocol/nagoya-protocol-en.pdf	Direct PDF download, confirmed live. Pairs directly with the already-indexed Biological Diversity Act.

Tier 2 — WIPO-administered filing systems (relevant to any Ayurveda IP going global)

Document	Suggested filename	Direct link (verified live)	Notes
Patent Cooperation Treaty (PCT) — single international patent filing route	PCT_Treaty_Text.pdf	https://www.wipo.int/pct/en/texts/articles/atoc.html	Portal page confirmed live — save the "Full Text" / article-by-article PDF from here.

Document	Suggested filename	Direct link (verified live)	Notes
Madrid Protocol — international trademark registration (relevant once Trade Marks Act is indexed too)	Madrid_Protocol_Legal_Text.pdf	https://www.wipo.int/madrid/en/legal_texts/	Portal page confirmed live — grab the Protocol + Common Regulations PDF.
Hague Agreement — international registration of industrial designs	Hague_Agreement_Legal_Text.pdf	https://www.wipo.int/hague/en/legal_texts/	Portal page confirmed live.
Budapest Treaty — international deposit of microorganisms for patent purposes (relevant to biotech/fermentation-based formulations)	Budapest_Treaty_Legal_Text.pdf	https://www.wipo.int/budapest/en/	Portal confirmed live — follow to its "Legal Texts" link for the treaty PDF.

Tier 3 — herbal / traditional-medicine export-market regimes (stretch, high demo value)

Document	Suggested filename	Direct link (verified live)	Notes
EU Directive 2004/24/EC — Traditional Herbal Medicinal Products (the actual EU registration route for Ayurvedic exports)	EU_THMPD_Directive_2004_24_EC.pdf	https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32004L0024	Page confirmed live — use EUR-Lex's "PDF" export option, not print-to-PDF.
US FDA Botanical Drug Development Guidance — the US route for botanical/Ayurvedic drug products	FDA_Botanical_Drug_Guidance.pdf	fda.gov — search "Botanical Drug Development Guidance for Industry"	Direct nav was blocked in this session's browser tool (not a dead link) — search from a normal browser instead.
WHO Traditional Medicine Strategy — the umbrella international policy framing most export regimes cite	WHO_Traditional_Medicine_Strategy.pdf	https://www.who.int/publications/i/item/9789241506096	Page confirmed live — use the "Download" button for the PDF.

After downloading

- Drop the PDFs into data/ with the filenames above (or equally clear ones).
- Add every filename to INTERNATIONAL_DOCUMENTS in backend/ingestion/indexer.py — this is the one step that's easy to forget and silently wrong if skipped.
- Re-run `python -m ingestion.indexer` from backend/ and check the per-file chunk-count log for each new filename.
- Sanity-check with a real question under the International jurisdiction toggle in the app (e.g. "What does TRIPS say about patentability?") before trusting it in a demo.

- Add 1–2 new cases to `eval/test_set.json` for the new documents and re-run `python -m eval.run_eval` — an unindexed-then-indexed document with no eval coverage is a real regression risk, not just a formality.

Everything on this page was checked directly (not guessed from memory) during this build. [FDA.gov](https://www.fda.gov) was the one exception — its guidance-document page blocked the automated browser tool used to verify the rest of this list, so that link needs a manual search rather than being a dead end.
